Yen Ting Wu

Software Engineer

a9600125a@gmail.com

HI

My name is YenTing Wu, a self-taught software engineer and a creator. My passion for being a software engineer lies in coming up with brilliant ideas with my colleges and enabling them. I take good care about experience, design and communication.

I am also an open-source collaborator, mainly contribute to React community. I currently work with Chakra UI team to build the doc site and maintain DevRel. I love to collaborate with people coming from different backgrounds but having the same goal - Building a better community.

Outside of programming, I love river trekking, biking in summer and exploring wild hot spring in winter. Nature always inspires me.

Projects

FoF
A brand new dating app.

`Expo` `React Native` `Zustand` `React Query`

420
A gallery for me to play with design skills and libraries. Mainly built with THREE.JS and p5.
